

SAFETY SEQUENCING

Directions: Cut out the boxes below. Arrange them in the proper order (1-5) of steps to take when you have a digging project to do.

1.

2.

3.

4.

5.

Wait for professionals to mark underground utility lines.

Utility workers mark underground pipes and wires.

Plan your digging project and decide where you want to dig.

Dig safely and make sure to stay clear of the markings.

Visit call811.com before you dig to request professionals mark underground utility lines.
