

# Home Electrical Safety checklist

Name \_\_\_\_\_

Date \_\_\_\_\_

To be a "Lifeguard of Life" like Safety Man, take this list home. Go over it with an adult to check your house for electrical hazards.

Find the UL Mark on some electrical appliances in your kitchen.  
List at least three.

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

Yes No

Are countertop appliances and their cords kept away from water?

Are cords in good condition—not damaged or cracked? Cords should not be run under rugs or nailed or stapled to walls and ceilings. Extension cords should have the UL Mark.

Did you check for and correct any overloaded outlets with the help of an adult?

Do you have G.F.C.I.s (Ground Fault Circuit Interrupters) in the bathrooms, kitchen and other places with water and electricity?

Yes No

Do you test your G.F.C.I.s once a month? (To test, push the test button. The reset button should pop out, cutting off the flow of electricity. To restore the power, push the reset button back in.)

Did you find the UL Mark on any electrical products in your house?

List the products you found with the UL Mark.

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

Signature of the adult who completed the checklist with you.

Congratulations for completing this home electrical safety checklist. You're a Lifeguard of Life! Remember to always keep these tips in mind whenever you're using electricity.

Look for the UL Mark when buying an electrical product.
